INDEX OF AUTHORS

Volume 45 July-December 1992 Russian Toms 322–324

Abanin, A. V. *Geometric criteria for representation of analytic functions by series of generalized exponentials* 407

Abdukarimov, A. See Yarmukhamedov, Sh.

Aĭite [Ayite], A. *Meromorphic and holomorphic functions that generate normal families on an arbitrary group of conformal automorphisms of the disk* 141

Alekseenko, S. N. See Imanaliev, M. I.

Al′sevich, V. V., Gabasov, R., and Kirillova, F. M. *An optimal regulator for linear systems with delays under finite-dimensional terminal constraints* ... 503

Aseev, V. V. *On the Möbius property of topological imbeddings preserving conformal moduli* 325

Askhabov, S. N. and Karapetyants, N. K. *Discrete equations of convolution type with a monotone nonlinearity in complex spaces* 206

Baĭramov, È. M. See Maksudov, F. G.

Bakhvalov, N. S. and Èglit, M. È. *On the propagation speed of perturbations in microinhomogeneous elastic media with small shear modulus* 239

Bakunin, G. N. See Bavrin, I. I.

Balashevich, N. V., Gabasov, R., and Kirillova, F. M. *Synthesis of adaptive optimal controls for linear dynamical systems* 412

Baltag, V. A. and Vulpe, N. I. *Number and multiplicity of singular points of a quadratic differential system* 235

Baskakov, A. G. *On splitting a differential operator with unbounded operator coefficients* 329

Baskakov, A. G. and Chan Khy·u Bong [Tran Huu Bong] *On almost-periodicity of solutions of linear functional equations* 509

Bavrin, I. I. and Bakunin, G. N. *Ballisticity of continuous functions* 269

Begmatov, A. Kh. *Problems of integral geometry and special operator equations of Volterra type* 606

Belov, Yu. Ya. *An inverse problem for the Burgers equation* 334

Berkolaĭko, M. Z. and Novikov, I. Ya. *Bases of wavelets in spaces of differentiable functions of anisotropic smoothness* 382

Berkovich, L. M. *Transformations of variables as a method of finding exact invariant solutions of the Kolmogorov-Petrovskiĭ-Piskunov equation and related nonlinear heat equations* 146

———. *Factorization as a method of finding exact invariant solutions of the Kolmogorov-Petrovskiĭ-Piskunov equation and the related Semenov and Zel′dovich equations* 162

Bilalov, B. T. *A necessary and sufficient condition for the completeness and minimality of a system of the form* $\{A(t)\varphi^n(t);\ B(t)\overline{\varphi}^n(t)\}$ 211

Volume 45 July-December 1992 Russian Toms 322–324

Abanin, A. V. *Geometric criteria for representation of analytic functions by series of generalized exponentials* 407

Abdukarimov, A. See Yarmukhamedov, Sh.

Aĭite [Ayite], A. *Meromorphic and holomorphic functions that generate normal families on an arbitrary group of conformal automorphisms of the disk* 141

Alekseenko, S. N. See Imanaliev, M. I.

Al′sevich, V. V., Gabasov, R., and Kirillova, F. M. *An optimal regulator for linear systems with delays under finite-dimensional terminal constraints* ... 503

Aseev, V. V. *On the Möbius property of topological imbeddings preserving conformal moduli* 325

Askhabov, S. N. and Karapetyants, N. K. *Discrete equations of convolution type with a monotone nonlinearity in complex spaces* 206

Baĭramov, È. M. See Maksudov, F. G.

Bakhvalov, N. S. and Èglit, M. È. *On the propagation speed of perturbations in microinhomogeneous elastic media with small shear modulus* 239

Bakunin, G. N. See Bavrin, I. I.

Balashevich, N. V., Gabasov, R., and Kirillova, F. M. *Synthesis of adaptive optimal controls for linear dynamical systems* 412

Baltag, V. A. and Vulpe, N. I. *Number and multiplicity of singular points of a quadratic differential system* 235

Baskakov, A. G. *On splitting a differential operator with unbounded operator coefficients* 329

Baskakov, A. G. and Chan Khy·u Bong [Tran Huu Bong] *On almost-periodicity of solutions of linear functional equations* 509

Bavrin, I. I. and Bakunin, G. N. *Ballisticity of continuous functions* 269

Begmatov, A. Kh. *Problems of integral geometry and special operator equations of Volterra type* 606

Belov, Yu. Ya. *An inverse problem for the Burgers equation* 334

Berkolaĭko, M. Z. and Novikov, I. Ya. *Bases of wavelets in spaces of differentiable functions of anisotropic smoothness* 382

Berkovich, L. M. *Transformations of variables as a method of finding exact invariant solutions of the Kolmogorov-Petrovskiĭ-Piskunov equation and related nonlinear heat equations* 146

———. *Factorization as a method of finding exact invariant solutions of the Kolmogorov-Petrovskiĭ-Piskunov equation and the related Semenov and Zel′dovich equations* 162

Bilalov, B. T. *A necessary and sufficient condition for the completeness and minimality of a system of the form* $\{A(t)\varphi^n(t);\ B(t)\overline{\varphi}^n(t)\}$ 211

Bloshanskiĭ, I. L. *The exact Weyl multiplier for the validity of generalized localization on any open sets for rectangularly summed three-dimensional Fourier series* 215
Bogachev, K. Yu. *Iterative methods of solving quasilinear elliptic problems in domains of complicated shape* 152
Boĭmatov, K. Kh. *Spectral asymptotics of m-sectorial operators* 1
———. *Spectral asymptotics of linear and nonlinear pencils of pseudodifferential operators that are elliptic in the Douglis-Nirenberg sense* 99
Borovkov, A. A. *On ergodicity of iterations of random Lipschitz transformations* 551
Bryuno [Bruno], A. D. *Smooth linearization of differential equations* 105
———. *On conditions for nondegeneracy in Kolmogorov's theorem* 221
Budaev, V. D. *The unconditional basis property for systems of root vector-valued functions of differential operators with matrix coefficients* 454
Burenkov, V. I. and Gusakov, V. A. *On precise constants in Sobolev imbedding theorems. II* 572
Buslaev, A. P. *On Bernstein-Nikol'skiĭ inequalities and widths of Sobolev function classes* 272
Chan Khy·u Bong [Tran Huu Bong] *On the Fredholm property for linear functional-differential operators* 641
———. See Baskakov, A. G.
Dairbekov, N. S. *The concept of a quasiregular mapping of several n-dimensional variables* 578
Dektyarev, I. M. *A new concept of defect for holomorphic curves* 355
Derkach, V. A. and Malamud, M. M. *Characteristic functions of linear operators* 417
Dezin, A. A. and Marchuk, N. G. *Perturbation of periodicity conditions in the simplest nonlinear model* 467
Ditkin, V. V. *On the root subspaces of a two-parameter spectral problem* 513
Dolotova, O. A. *On the complexity of minimal verifying tests for Post classes* 610
Dosiev, A. A. *A block-grid method for increasing accuracy in the solution of the Laplace equation on polygons* 396
Dzhangibekov, G. *On a class of two-dimensional singular integral operators with several fixed singularities* 15
Dzhumaev, S. and Mukhamadiev, È. *On the question of regularization of operator equations* 556
Dzhuraev, A. *On degenerate systems of first-order partial differential equations* 391
Èdel'shteĭn [Edelstein], S. L. *Asymptotic splitting of boundary value problems for differential equations in Banach spaces* 379
Èglit, M. È. See Bakhvalov, N. S.
Egorova, I. E. *On a class of almost periodic solutions of the KdV equation with nowhere dense spectrum* 290
Evtukhov, V. M. *Asymptotic representations of monotonic solutions of a nonlinear nth order differential equation of Emden-Fowler type* 560
Fayazov, K. S. *An ill-posed Cauchy problem for a differential equation with operator coefficients* 635
Filippov, V. V. *On stationary points and some geometric properties of solutions of ordinary differential equations* 497
Gabasov, R. See Al'sevich, V. V.
———. See Balashevich, N. V.

Galeev, È. M. *On Bernstein-Nikol'skiĭ inequalities that are best with respect to choice of harmonics* 281
Galstyan, S. Sh. *On convergence and unconditional convergence of Fourier series* 286
Gavrilenko, Yu. V. *Congruences on terms and properties of dependence relations between variables* 338
Gel'fand, I. M., Graev, M. I., and Retakh, V. S. *Generalized hypergeometric functions associated with an arbitrary finite or locally compact continuous field* 343
Glavan, V. A. See Samoĭlenko, A. M.
Gol'berg, A. I. and Gurvich, V. A. *A tightness criterion for reciprocal bipartite cyclic game forms* 348
Golubyatnikov, V. P. *Questions of stability in recovering certain compact sets from their projections* 12
Gorelov, V. A. *On systems consisting of a finite and an infinite number of root functions of different boundary value problems* 463
Graev, M. I. See Gel'fand, I. M.
Gurvich, V. A. *Information extensions of game forms* 110
———. *Positional structures and chromatic graphs* 168
———. *Algebraic properties of effectivity functions* 245
———. See Gol'berg, A. I.
Gusakov, V. A. See Burenkov, V. I.
Gusev, M. I. *On the structure of optimal minimax estimates in problems of guaranteed estimation* 173
Imanaliev, M. I. and Alekseenko, S. N. *On the theory of nonlinear integro-partial differential equations of Whitham type* 360
Iskhokov, S. A. *A variational Dirichlet problem for an elliptic system of differential operators degenerate on the boundary* 26
Islamov, G. G. *On an upper estimate of the spectral radius* 177
Kaplan, A. A. and Tikhachke [Tichatschke], R. *Adaptive methods of solving ill-posed semi-infinite convex optimization problems* 119
Kapustin, N. Yu. *On a property of generalized analytic functions* 124
Karapetyants, N. K. See Askhabov, S. N.
Karatsuba, A. A. *On the distribution of real zeros of the function* $\zeta(\frac{1}{2} + it)$ 46
Khapaev, M. M. *Singular differential equations in problems of the study of functions at a conditional extremum* 322
———. *Singular differential equations in control problems with constraints* ... 706
Khlobystov, V. V. See Makarov, V. L.
Khoang Van Kuang [Hoang Van Quang] See Gaĭshun, I. V.
Khusainov, A. A. *On the Hochschild-Mitchell dimension of the number line* .. 89
Kirillova, F. M. See Al'sevich, V. V.
———. See Balashevich, N. V.
Knyazev, A. V. and Skorokhodov, A. L. *Iterative methods of gradient type in a subspace for a partial symmetric generalized eigenvalue problem* 474
Kolokol'tsov, V. N. *The stochastic Bellman equation as a nonlinear equation in Maslov spaces. Perturbation theory* 294
Kolokol'tsov, V. N. and Maslov, V. P. *Bellman's differential equation and Pontryagin's maximum principle for multicriteria optimization problems*. 522
Korenevskiĭ, D. G. *On asymptotic stability of solutions of systems of linear deterministic and stationary stochastic difference equations with delay* 48

Korenovskiĭ, A. A. *The reverse Hölder inequality, the Muckenhoupt condition, and equimeasurable rearrangements of functions* 301
Korepanov, È. R. *Discrete conditionally optimal filters with memory* 528
Korobeĭnik, Yu. F. and Melikhov, S. N. *A continuous linear right inverse for a representation operator, and conformal mappings* 428
Korotyaev, E. L. *The method of Enss, taking account of anisotropy* 653
Kozlovskiĭ, O. S. *The dynamics of intersections of analytic manifolds* 425
Krasovskiĭ, A. N. *A differential game for a positional functional of the phase coordinates and control actions* 180
Kudryavtsev, L. D. *On stabilization boundary value problems* 53
———. *On the solutions of ordinary differential equations the integrals of whose derivatives converge conditionally* 479
Kurta, V. V. *On Phragmén-Lindelöf theorems for semilinear equations* 31
Larin, V. B. *Construction of a nonnegative definite solution of the Lyapunov equation* 129
Lebedev, V. I. and Skorokhodov, A. L. *Quadrature formulas of orders* 41, 47, *and* 53 *for the sphere* 587
Lizorkin, P. I. and Rustamov, Kh. P. *On some equivalent normings of a Nikol'skiĭ-Besov space on the sphere* 58
Maĭorov, V. E. *Widths of spaces endowed with a Gaussian measure* 305
Makarov, V. L. and Khlobystov, V. V. *Polynomial interpolation of operators in Hilbert spaces* 624
Makin, A. S. *On Riesz means of biorthogonal expansions in root functions of nonselfadjoint extensions of the Schrödinger operator* 132
Maksudov, F. G., Baĭramov, È. M., and Orudzheva, R. U. *The inverse scattering problem for an infinite Jacobi matrix with operator elements* 366
Malamud, M. M. See Derkach, V. A.
Malikov, Z. See Yarmukhamedov, Sh.
Malyshev, V. A. *Differential inequalities and Hadamard's conjecture* 371
Mamedov, M. A. *Turnpike theorems in continuous systems with integral functionals* 432
Marchenko, V. A. *Characteristic properties of Weyl solutions* 563
Marchenkov, S. S. *On maximal subalgebras in products of the iterative Post algebras* $\mathfrak{P}_2$ *and* $\mathfrak{P}_3$ 593
Marchuk, N. G. See Dezin, A. A.
Martynyuk, A. A. *On multistability of motion with respect to some of the variables* 533
Maslov, V. P. See Kolokol'tsov, V. N.
Maslov, V. P. and Samborskiĭ, S. N. *Existence and uniqueness of solutions of the steady-state Hamilton-Jacobi and Bellman equations. A new approach* 682
Melikhov, S. N. See Korobeĭnik, Yu. F.
Melikov, T. K. *Recurrence conditions for optimality of singular controls in systems with delay* 184
Mel'nik, V. S. *On T-differentiable functionals* 659
Merzlyakov, Yu. I. *On Kargapolov groups* 34
Mikhaĭlov, L. G. *On the theory of total differentials with singular points* 157
Miklyukov, V. M. *On a Lorentz-invariant characteristic of maximal tubes in Minkowski space* 63
Mingalev, I. V. *On global solvability of the Cauchy problem for discrete models of the Uehling-Uhlenbeck equation* 537

Mingalev, O. V. *On solutions in the form of a traveling wave in a discrete model of the Uehling-Uhlenbeck equation* 484
Monakhov, V. N. and Seleznëv, V. A. *Dynamical systems determining quasiconformal mappings* 189
———. *On certain properties of quasiconformal dynamical systems in the large* 541
Monin, A. S. *On jointly orthogonal expansions of multicomponent random functions* 403
Mukhamadiev, È. See Dzhumaev, S.
Mukminov, F. Kh. *On the rate of decay of a solution of a mixed problem for the Navier-Stokes system of equations in a domain with noncompact boundary* 688
Musin, I. Kh. See Napalkov, V. V.
Nakhushev, A. M. *The effect of localization of the singularity of the gradient of the solution of Darboux's problem for the Gellerstedt equation, and a criterion for its continuity* 436
Napalkov, V. V. and Musin, I. Kh. *A description of analytic functionals in certain classes of domains* 375
Natanson, G. I. See Zhuk, V. V.
Nepomnyashchikh, S. V. *The method of partitioning the domain for elliptic problems with jumps of the coefficients in thin strips* 488
Nguen Tien Kkhiem [Nguyen Tien Khiem] *Conditions for the existence of a steady-state solution of the Fokker-Planck-Kolmogorov equation in amplitude and phase variables for nonlinear oscillatory systems* 67
Nguen Van Min' [Nguyen Van Minh] See Zabreĭko, P. P.
Nikol'skiĭ, M. S. *On a linear problem of tracking motion* 193
Nikol'skiĭ, S. M. *Approximation by entire functions of exponential type in the metric of a Banach space* 567
———. *On a method for approximating functions by polynomials on a manifold* 597
Nogin, V. A. See Zavolzhenskiĭ, M. M.
Novikov, I. Ya. See Berkolaĭko, M. Z.
Orudzheva, R. U. See Maksudov, F. G.
Orynbasarov, E. M. See Sadybekov, M. A.
Osmanov, G. I. *On absolute convergence of the Fourier integral in R_n* 441
Platonov, S. S. *Invariant subspaces in some function spaces on symmetric spaces of rank* 1. *Symplectic and exceptional cases* 73
Radkevich, E. V. *The dynamic angle problem for the Gibbs-Thomson law* 444
———. *The problem of a dynamic angle for the Verigin-Muskat problem* 629
Ramazanov, M. D. *Universal optimality of lattice cubature formulas* 665
Retakh, V. S. See Gel'fand, I. M.
Rudzkis, R. *Probabilities of large excursions of empirical processes and fields* 226
Runovskiĭ, K. V. *On approximation in an "angle" in L_p spaces, $0 < p < 1$* 38
———. *On approximation by algebraic polynomials in L_p-spaces, $0 < p < 1$* . 310
Rustamov, Kh. P. *On characterization of fractional powers of the Beltrami-Laplace operator on the sphere with the help of fractional finite differences* 670
———. See Lizorkin, P. I.
Ryazanov, V. I. *On necessary and sufficient conditions for Belinskiĭ differentiability* 313
Sabitov, K. B. *An alternating method of Schwarz type in the theory of equations of mixed type* 136

Sadybekov, M. A. and Orynbasarov, E. M. *The basis property for a system of root functions of a boundary value problem with displacement for the Lavrent'ev-Bitsadze equation* 692
Salimov, A. A. *Almost ψ-holomorphic tensors and their properties* 602
Samborskiĭ, S. N. See Maslov, V. P.
Samoĭlenko, A. M. and Glavan, V. A. *Linear almost periodic systems admitting an almost periodic orthogonalization process* 198
Savina, T. V., Sternin, B. Yu., and Shatalov, V. E. *On the reflection law for the Helmholtz equation* 42
Seleznëv, V. A. See Monakhov, V. N.
Sharafutdinov, V. A. *The quasi-isotropic approximation of geometric optics and problems of tomography* 450
Shatalov, V. E. See Savina, T. V.
———. See Sternin, B. Yu.
Shavgulidze, E. T. See Smolyanov, O. G.
Shchan'yuĭ Chzhou [Xiang-Yu Zhou] *On orbital convexity of domains of holomorphy invariant under a linear action of tori* 93
Shelukhin, V. V. *The problem of predicting the temperature of the ocean from average data over a preceding period of time* 644
Shin, V. I. See Sinitsyn, I. N.
Sidoravichyus [Sidoravičius], V. See Statulyavichus [Statulevičius], V. A.
Sinitsyn, I. N. and Shin, V. I. *Conditionally optimal filtering of processes in stochastic differential systems with autocorrelated noise in the observations according to complex statistical criteria* 545
Skorokhodov, A. L. See Knyazev, A. V.
———. See Lebedev, V. I.
Skubachevskiĭ, A. L. *Boundary value problems for differential-difference equations with incommensurable shifts* 695
Smolyanov, O. G. and Shavgulidze, E. T. *The support of the symplectic Feynman measure, and the uncertainty principle* 492
Soltanov, K. N. *Solvability of nonlinear equations with operators of the form of the sum of a pseudomonotone and weakly compact operator* 676
Statulyavichus [Statulevičius], V. A. and Sidoravichyus [Sidoravičius], V. *Convergence to a Poisson law on CCR and CAR algebras* 202
Sternin, B. Yu. See Savina, T. V.
Sternin, B. Yu. and Shatalov, V. E. *Fourier-Maslov integral operators associated with a bundle, and an extension of the algebra of pseudodifferential operators* 252
———. *On a class of nonlocal elliptic problems* 317
Subbotin, A. I. *Continuous and discontinuous solutions of boundary value problems for first-order partial differential equations* 257
Sutyrin, V. G. *The minimal surface separating equal regions in space, or the structure of an ideal dry foam* 700
Tikhachke [Tichatschke], R. See Kaplan, A. A.
Tkachenko, V. A. *Spectral analysis of a nonselfadjoint Hill operator* 78
Tsar'kov, I. G. *Theorems on global existence of an implicit function, and their applications* 638
Ul'yanov, P. L. *On absolute convergence of trigonometric Fourier series* 83
Umarov, S. R. *On well-posedness of boundary value problems for pseudodifferential equations with analytic symbols* 229

Vakarchuk, S. B. *On widths of some classes of entire transcendental functions of several complex variables* 387
Vavilov, S. A. *Geometric methods of studying the solvability of a class of operator equations* 276
Vedenyapin, V. V. *On the classification of steady-state solutions of Vlasov's equation on the torus, and a boundary value problem* 459
Vulpe, N. I. See Baltag, V. A.
Yakubov, V. Ya. *Unboundedness of normalized vector-valued functions of Dirac-type systems* 262
Yarmukhamedov, Sh., Abdukarimov, A., and Malikov, Z. *On the Cauchy problem for first-order elliptic systems* 266
Zabreĭko, P. P. and Nguen Van Min' [Nguyen Van Minh] *The group of characteristic operators and its applications in the theory of linear ordinary differential equations* 517
———. *Exponential dichotomy and integral manifolds in the theory of flows, and their applications* 583
Zavolzhenskiĭ, M. M. and Nogin, V. A. *An approximation approach to the inversion of generalized Riesz potentials* 619
Zhuk, V. V. and Natanson, G. I. *On approximation of functions on standard simplexes* 614
Zhuravlev, I. V. *On the existence of a homeomorphic solution for a multidimensional analogue of the Beltrami equation* 649
Zubov, V. I. *Analytic representation of motions that are Poisson stable* 21
———. *Differential equations of evolution of forms* 115
———. *The evolutionary development of forms is independent of aftereffects* .. 400
———. *The ergodic behavior of the distribution functions of probabilistic processes* 470
